1 of 1 - Memo for Chairman,

opportune Science & Technology

Highlighted Areas of Basic Scientific Research
(Developed at the November 22, 1957, Meeting of the Science Advisory Committee)

B X

407117

Fields	Projects
Operation of Brain	Controlled Fusion
Information Theory and Genetics	Power and Energy
Analysis (Pure Math)	Missiles Engineering
Materials Visco-Elasticity	Water
Physics of Weather	Food
Structure of Language	Space Science
Geophysics	Support of Scientific Journals
Oceanography	
Development of Modern Man	Research Institutes
Biochemistry of Genetics	Capital Equipment for Research
High Temperature Chemistry	MISSILE PROP., FUELS, & POWER
