D/C
Admiral Arleigh A. Burke, USN
Chief of Naval Operations
Department of the Navy
Washington 25, D. C.

Medical follow-up.

Dear Admiral Burke:

It is a pleasure to report that the sixth follow-up medical examination of the Marshallese Islanders has been successfully completed and the personnel of the team are preparing their data for publication.

Preliminary analyses of their data indicate that no untoward clinical effects have occurred in the population although there has been a slight increase in the body burden of certain radioactive nuclides.

Dr. Robert A. Conrad, Leader of the team, has written that Lt. W. E. Lasciter, USN, Commanding Officer of the USS DUVAL COUNTY (LST 750), and the officers and crew of the ship cooperated in every way possible and contributed greatly to the success of the expedition.

Dr. Conrad has also asked me to note the outstanding assistance rendered the team by several other Navy personnel. Commander I. V. King (MBC), USN, served as a most effective Navy Liaison Officer in the Washington area. Captain G. E. Van der Aus, USN, Commanding Officer of the Naval Medical Research Institute, supported the mission to the fullest and at Hawaii, Captain Harry Etter (MC), USN, was a most efficient Liaison Officer to the Commander-in-Chief of the Pacific Fleet. At Kwajalein the Commanding Officer, Captain Alfred L. Cope, USN, cooperated in every possible way and particularly in arranging for air support of the Operation Rongelap. Commander F. W. Meyer (MC), USN, the senior medical officer at Rongelap, was also extremely helpful.

Wm/B 6

Admiral Arleigh A. Burke, USN

- 2 -

It is quite evident that we and the team are greatly in your debt and all the more so because we are unable to express our appreciation to all of the Navy personnel whose splendid support all down the line was essential for the successful completion of the mission.

Sincerely yours,

SIGNED, A. R. LUEDECKE
