Dr. Philip F. Gustafson  
Division of Biological & Medical Research  
Argonne National Laboratory  
Box 299  
Lemont, Illinois

Dear Dr. Gustafson:

Thank you ever so much for your letter of July 12 bringing me up to date on  $RaSO_4$  inhalation cases. I will be particularly interested in knowing what you learn from the measurements of the Cincinnati people which you indicate will take place fairly soon.

This is very important work and has many implications in the realm of industrial hazards from radioactive materials, consequently I am delighted to see that you are pursuing it intensively.

Sincerely yours,

Charles L. Dunham, M.D.  
Director  
Division of Biology and Medicine
