

Harold L. Price, Director
Division of Civilian Application

E. E. Fields

General Manager *Signed by
R. W. Cooke*

PITTSBURGH TESTING LABORATORY

Reference is made to the report prepared by the Division of Inspection, dated May 22, 1956, regarding the Ft. Salvoir APPA-1 Radiation Incident and the memorandum from C. A. Nelson of May 23, same subject.

You will note that, in order to assure that corrective action is taken, the Inspection Division recommends that a letter be directed to the Pittsburgh Testing Laboratory setting out the deficiencies noted during the inspection of the APPA incident, citing specific regulations and license provisions which were violated. Please see that such a letter is sent which will also require them to inform the Commission when corrective action has been completed.
