

STANDARD FORM NO. 64

Office Memorandum • UNITED STATES GOVERNMENT

TO : FILES

DATE: August 10, 1954

FROM : C. L. Dunham *CD*

SUBJECT: RADIATION EXPOSURE FIGURES FOR AIR WEATHER PERSONNEL AND MARSHALLESE

SYMBOL: BM:CLD

I received a call today from Dick Elliot expressing his disappointment that in the Sixteenth Semiannual Report the story about Air Weather personnel and Marshallese contained no estimates of the dose of radiation received by these persons as is contained in the June 30 Program Status Report. He feels it would be very helpful to him and Al Graves in conducting future Stateside tests to have these as a sort of point of reference in talking to lay persons about radioactive contamination and fallout in and about the Nevada Proving Grounds. I indicated that it was my belief that such information would be out in an unclassified form well in advance of any future test activities in Nevada.
