Dr. Donald Michael telephoned today to request information on certain of the psychological aspects of the exposure of native populations in the Pacific to fallout. Dr. Michael identified himself as being on the staff of the Secretary of Defense in the Weapons System Evaluation Group.

Inasmuch as I could not identify Dr. Michael over the telephone, I told him I would call him back. I further mentioned that I felt his inquiry should more properly be directed to you. Considering the fact that you are practically fresh out of time, do you wish for me to see Dr. Michael? Or do you think you may have an opportunity to see him or telephone him tomorrow?

His extension in the Office of the Secretary of Defense is x-76798 (INFO at the Pentagon switch board tells me they have a Donald N. Michael at the extension given.)
