Dr. Paul B. Pearson, Chief  
Biology Branch  
Division of Biology and Medicine  
US Atomic Energy Commission  
Washington 25, D.C.

Dear Dr. Pearson:

In this morning's mail we received a paper from Professor Yoshio Hiyama, Tokyo University, entitled, "Effect of Radio-activity Studied from the Standpoint of Fisheries Biology," No. III. This publication is in Japanese. We will try to have it translated in hopes that copies will be available for your use by the time sessions start in Japan next month.

Last summer when we were in Japan <sup>Japan!</sup> Professor Hiyama gave me his notes and descriptions of the early measurements made by the Japanese on the fish collected. We have since had this translated and as soon as copies are corrected we will make them available to you. We appreciate very much Prof. Hiyama's thoughtfulness and consideration in keeping us constantly advised on the progress of their work.

Yours very sincerely,

*Lauren R. Donaldson*
