Colonel George A. Roy, USAF
Assistant Chief of Staff
Defense Atomic Support Agency
Department of Defense
Washington 25, D. C.

Dear Colonel Roy:

Reference is made to letter, WADAMA-3 922.10, of June 29, 1960, requesting the latest data available by shot for W¹³⁷ and Rb¹³⁴ production during HARDTACK I.

These data are given in the attached tables. No changes in these values have been made within the past year. The activity of Rb¹³⁴ is based on particular decay schemes assumed by the investigators. Drs. Martell and Kalkstein of AFPCG have used a Rb¹³⁴ production in Orange shot of "about 3 megacuries".

Sincerely yours,

Alfred D. Starbird
Brigadier General, USA
Director of Military Application
