

Tokyo, Japan  
10 Aug - '56

Dear Mr. Cannon:

I must say my apologies at first that I didn't write for long time to appreciate for your kindness and great assistance for me and also your warm hospitality and stress at your office. Please, forgive me.

I have been very busy since I returned to Tokyo. Because, I had to work hard at Hospital as I was absent for 7 weeks and I had to translated TV program script into English for its purpose of send to Dr. Conrad, also I had to write an article on some Magazine.

Movie film showing on the  
T.V. for 20th May.

Contents of movie film was  
unsatisfactory because economy  
of activities of Medical Team  
was very very small quantity.

If I could say frankly to you,  
I have mistaken to selected

T.V Director to make such document

T.V film because Mr. HAYASHI is  
so young and he is a not good

director which is made such

long film documentary, and also

he was double-crossed me

about promise of making film

before we left Japan between

I and him.

I am very disappointed.

I should have had to find

other director with me, it would

had better.

I would like to let you know the  
most important effect of movie

film on air on T.V.

I found out one fact that we have never seen any news and articles about Bikini victims and even exposed peoples of Marshallse at all.

Two young exposed Marshallse who were exposed at Rongelap Island and they are living at Ebege Island now had come to Japan to have physical examination at Nagasaki by invitation of Japanese Radical group and recommended by congress of district of Marshall Islands in middle of May. This news was reported on almost news paper in Japan and also even in English news paper of Japan. But, it was complete nothing of announcement of about them when they have left Japan. Because, our movie film was on air on T.V. already.

And my article was published on  
June in all over the Japan so  
that no one can not speak  
and announcement about exposed  
people of Marshall Islands at all.

Because, I have been in Marshall  
Islands joining with U.S. medical  
Survey Team and I took examination  
in physically in my hand and saw  
by my eyes in the fact.

And I know why political confusion  
were happened at Marshall Islands,  
also I know very well about  
character and mental construction  
of Micronesia people because  
I have ever been Micronesia  
for more than 7 times.

Many Marshallese requested to me  
that should be come again in  
next year with medical survey  
Team of U.S.A, and joining  
of me in survey Team makes  
more friendly; makes increasing  
good relationship between medical

Survey Team and Marshall peoples  
also exposed people.

This will make good results  
for the friendship and cooperation  
in future, between U.S and  
Micronesia, as they said to me.  
I think, this is true.

The relationship between medical Team  
which has been conducted by Dr.  
Conrad and Marshallese have  
been so long time for 22 years,  
so they likes to have examination  
from different kind of doctor  
especially Japanese because  
Micronesia peoples were Japanese  
for 32 years ago.

Sometimes, people likes to have  
examination by different kind  
of physician and this is  
common psychological phenomenon  
in practice at this world, I think.

Also, I must tell you very  
interesting story about the people

of exposed Islands in Marshall Islands.

① Exposed people who ~~are~~ <sup>are</sup> living at Rongelap and Utrik and almost people who are move to Ebeige Island are very friendly, co-operative deeply appreciation and deeply trust to U.S. Medical Survey Team.

But, on the other hand, leaders of Island who were not born in any exposed Islands and who has never live in such Islands also who ~~were~~ <sup>were</sup> given monthly salary from U.S. government and also, then, people who are living at exposed Islands, Rongelap, Utrik Island for only couple years because they have moved from its other Islands where

there are located very far  
from exposed island for the  
purpose of the living with  
their kith and kin to eat and for  
their life.

Such leaders and people who  
are coming from the other islands  
are always make confusion  
and make troubles also against  
medical survey team.

It is very strange because  
they were not exposed and  
also even they have never  
worrying about over the exposed  
people or physical condition from  
their genuine heart, only they  
are explain and complain also  
making confusion or politically.

There is very strange, interesting  
custom at Marshall Islands.

If a people and family found  
their or his relation or even  
very far kith and kin at some

Island in spite of it is located  
so far distance from their house,  
he or they will move to such Island  
for the purpose to live and to eat  
at their relation who are working  
as usually ordinary, same as very  
few people in the Islands.

And he or his family to be sent up  
or he no longer able to make  
living at their relation then  
they will find another relation  
at another Island.

So always they are moving to  
Island to Island to eat and to  
live by depend upon their  
relation for support.

So by such reason, it is very  
difficult to find one person  
or patient at the next year if  
I saw one person at a Island.

So Dr. Conrad have much  
troubles to find one patient.

at Annual Conference, I guess.  
Could you understand for a  
my meaning of it.

I should like to tell you more  
but I must stop to write at  
this time.

I have been waiting Mr. Liverson  
when he have come to Japan  
but I couldn't make to see  
him. It was very disappointed.  
Please tell him when you see  
see him.

Well, I like to say again  
Thank you very much for  
your kindness and warm  
hospitality when I was your  
office and Washington.

I hope, I should like to see  
you again in recently very  
much.

Please, tell my appreciation to  
the people who most arranged  
movie film showing at film  
showing room at your building.

I hope, you will have nice  
summer vacation.

Best Regards;

Chitoo Jayakumar
