Attention: Mr. C. L. Blum, Assistant Business Manager

Subject: Sub contract #106

Dear Mr. Blum:

It has been my intent to write you sooner. However, it seemed advisable to await the return from EPO of certain hardware produced against the subject contract. This statement is made, as you are probably aware of the various conversations between our Mr. Timney and your Messrs. Betzel and Fleming relative to our possible use on another Government contract of some of the original hardware, particularly in connection with the basic ASP meters, and such use would only be possible with the full approval of your office with a resultant agreement to the use of such hardware against sub contract #106.

The ASP meters are now in our storage and I feel that I should be in communication with you at the present time as we have initially agreed to use the ASP meters in connection with the Government contract. I will be glad to discuss this matter with you at any time and will be glad to provide you with a copy of the ASP meters. After you have reviewed the relative basic applicable data, I will be glad to discuss this matter with you at any time.

In the interim it would be desirable to have a copy of the proposed scope of the ASP meters. I will be glad to provide you with a copy of the ASP meters. After you have reviewed the relative basic applicable data, I will be glad to discuss this matter with you at any time.
