University of California  
Radiation Laboratory  
Bldg. 50, Room 236  
Berkeley, California

Dear Sir:

During a recent field operation two members of your staff, James F. Ball and Carl L. Lindeman, served in a supervisory capacity with the group responsible for the radiological safety of Task Group 7.3.

This Laboratory wishes to express its appreciation for the competent and willing services rendered by these individuals. The health physics experience which they brought into the project was in a large part responsible for its successful completion.

The leadership and initiative provided by these men was an important factor in the excellent showing made by Proj. O.17 on this Operation.

Very truly yours,

*R. A. Kinnear*
