MEMORANDUM FOR CHAIRMAN SEABERG
 COMMISSIONER GRAHAM
 COMMISSIONER LAWRENCE
 COMMISSIONER CLOON
 COMMISSIONER WILSON

THROUGH GENERAL MANAGER (Signed) A. Tammaro *for*

SUBJECT: SUMMARY AND REPORT ENTITLED "MEDICAL SURVEY OF BONGELAP PEOPLE FIVE AND SIX YEARS AFTER EXPOSURE TO FALLOUT"

Forwarded as a matter of interest are copies of a summary and report entitled "Medical Survey of Bongelap People Five and Six Years after Exposure to Fallout." The report was prepared at the Brookhaven National Laboratory based on data obtained by Dr. Robert Conard and associates. The summary was prepared by Dr. William S. Lotz of this Division. The factual make-up of this material is considered non-controversial.

In brief, the Marshallese are not showing clinical signs and symptoms or abnormalities clearly attributable to their 1954 exposure. They continue to show, however, low body burdens of Sr⁹⁰, Cs¹³⁷ and Pu²³⁹, all of which we believe to originate from the contamination in their current food supplies; the Sr⁹⁰ is believed to come from the seafood caught locally.

15/
 G. L. Dunham, M.D., Director
 Division of Biology and Medicine
