In a conversation with Dr. Donaldson on Friday, June 20, he mentioned that Col. Lucke had informed him that he (Col. Lucke) had not received official word of the change in schedule of the DE "Silverstein" for the post-Hardtack oceanic survey. In a letter from DBM (Seymour) to Lucke on March 3, the change in schedule for Program 40.1 was outlined with mention of the accompanying change for the "Silverstein". The change had been made in response to a request from Lt. Col. Schmittke who in turn was acting in response to a request from the Joint Task Force.

In regard to the problem brought to our attention by Donaldson, Schmittke believes that the problem will be solved by finding the letter that was sent from the Joint Task Force to Task Group 7.1 in which the Task Force asked that information on the contamination of the water in the Restricted Area be obtained as soon after the conclusion of the Hardtack series as possible. This is the letter that Schmittke mentioned in the conversation with you and me a few days before you left for the Pacific and which he suggested that you locate after your arrival at Eniwetok.

After you have located the letter and have had an opportunity to discuss the matter with Lucke and Donaldson would you please let us know, as soon as possible, if further action is needed.

cc: Col. Schmittke, DMA  
 Dr. Dunning, B&M  
 Dr. Donaldson, U. of Wash.
