Dear Colonel Gaylord:

While I was out in the Pacific Proving Grounds this Spring I noted that pictures were being taken by members of your command of the natives evacuated from Rongelap and Uterik. Since the Division of Biology and Medicine, Atomic Energy Commission, has been or will be called upon to make various reports concerning these developments, it would be very helpful if you would supply us with some of these photographs, especially any that may be close-up shots showing epilated or ulcerated areas. The exact number will be left to your judgment but probably ten to twenty will be adequate. Any costs will be sustained by the Division of Biology and Medicine.

Sincerely yours,

Gordon M. Dunning, Health Physicist
Biophysics Branch
Division of Biology and Medicine
