This material contains information affecting the national defense of the United States within the meaning of the espionage laws, Title 18, U.S.C., Secs. 793 and 794, and the unauthorized revelation of which in any manner to an unauthorized person is prohibited by law.

Dear Dr. Jones:

Since my first letter I have found out a little more information about the Russian shot from AFQAT. The debris is expected to reach North America by tomorrow, September 21. Most of it will probably pass to the north of the United States, and wherever it goes, fallout will be much lower than that associated with our recent spring series.

It looks, therefore, as though we will not have enough debris to learn a great deal from. However, it may still be worth while to make a few measurements. If you do attempt any, we will certainly be interested to hear what you find, positive or negative.

Sincerely yours,

**Robert A. Dudley
Biophysics Branch
Division of Biology and Medicine**
