Geneticist, Biology Branch
Division of Biology and Medicine
U. S. Atomic Energy Commission
Washington 25, D. C.

Dear Dr. Green:

BEST COPY AVAILABLE

Having seen this article I believe that the A. E. C. is holding out on this. Just as soon as we have a democratic Congress I am going to get in touch with Senator Johnson and get an investigation. However, I expect that Pearson knows Johnson lots better than I do. Seriously, I wrote you to see if we were to have a meeting at the Argonne November the 19th and the 20th. Who else will be there if you have decided? I was considering going on to New York to see Dobzhansky and some other people but if he is to be at the meeting this would be unnecessary. I might even go out to see Crow and Irwin at Wisconsin as I have never been to Wisconsin. I would be glad to have the meeting last a week under the circumstances to pay for all these side trips I hope to make. At any rate let us hear what you can about who will be there and any other details that I might need to know. Let me know what you decided about the different clearance papers.

Best regards to you and your frau.

Yours sincerely,

Wilson S. Stone
