Re: Dehumidification of Rolled-Up Stations - Station 70, 2201, and 2301

Date: April 21, 1954

Attached is a copy of memorandum No. O/S 7869 dated April 14, 1954, which we have received from the jobsite requesting that we investigate the availability of room dehumidifiers operating on the Serval principle for certain stations. It is requested that this request from the field be investigated.

In addition, we should compare the cost of using the existing equipment in the subject stations with a portable generator as a power source.
