Engineers - Constructors

DECLASSIFIED PER DOE  
LETTER DATED JULY, 15, 1994  
FROM ANTON BENSIGALLET TO  
DEANE S. NIXON

To: General Superintendent, Supply

UGH: 922

405994

From: Acting Resident Engr.

RE: Weather Station Generators

DATE: 22 June 1957

R

Attached is a copy of a letter received by this office from the Superintendent of the Electrical Department, through the General Superintendent Construction-Maintenance, for your review and action.

I fully concur with Mr. Prouty's recommendations, as set forth in his letter, which will simplify the electrical distribution systems at the old weather stations where it is now intended to use the 15 KW single phase units.

We therefore recommend that Mr. Prouty's suggestion of the purchase of additional 60 KW, 3 phase units be adopted if at all possible.

*not from the old weather stations but to use the generator in the new station to determine feasibility of making the double distribution system.*
