SURVEYS
FOLDER AUGUST 1, 1953 ON

Four 50 meter K & E Lovar Tapes were purchased for the present operation. These tapes were certified to second order accuracy by the National Bureau of Standards with the statement that they met first order standards but would not be so certified until one further test has been made.

It is proposed that these tapes be sent to the National Bureau of Standards for testing and then returned to Jobsite.

Your advice as to this or some other course of action will be appreciated; also, any information you may have as to the National Bureau of Standards' requirements as to packing the tapes, the dates on which they conduct the tests, etc.

C. F. Dunlap
Resident Engineer
