ENGINEERS CONSULTANTS

TO: DAVID L. NARVER, JR.

JOB: 881 34 14

FROM: H. L. DIETZE

RE: AMBULANCE INFIRMARY - TARE

DATE: 31 MARCH 1953

R

Attached are two copies of a memorandum from C. C. Custer and three (3) prints of sketch MIS 411 showing the proposed addition to the Infirmary at Tare.

The 16-foot wide addition proposed as an alternative by Dr. Custer is not suitable because the length of the building would be increased to 36 feet and space is not available for such an addition.

Dr. Custer has also requested that a sink be added in the surgery room.

RE: ADDITION TO INFIRMARY - TARE

DATE: 31 MARCH 1953

Attached are two copies of a memorandum from Dr. C. C. Custer and three (3) prints of sketch MISC. 44, showing the proposed addition to the Infirmary at Tare.

The 16-foot wide addition proposed as an alternative by Dr. Custer is not suitable because the length of the building must be increased to 36 feet and space is not available for such an addition.

Dr. Custer has also requested that a first aid room be added to the surgery room.
