

Scheduled location by nearest Critical Target Area of Fire Pumpers procured with Federal-State Matching Funds

(All such pumps will be located within 150 miles of one or more Critical Target Areas.)
 Based on current assumptions, it is estimated that the number of pumps required in event of attack is approximately 6,700 above peacetime strength. The 1,374 pumps for which matching funds have been made available through June 30, 1945, will make up for about 20 percent of this deficit.
