approach geared to a twelve-month period, and that special attention
taken not to unbalance the present program.

4. Other business. The speaker also discussed the progress made
for the power reactor demonstration program, the results of the
missions from private power, and the status of the power program. The
total private investment of \$200 million for the construction of a
700,000 KW capacity to be installed in operating by 1965. The
public announcement of the details of the program, and it was noted
that considerable foreign interest had been expressed in the results of
the U.S. industry proposals.

5. The next meeting will be held on April 22, 1954, in room 5104 New State.
