

JOINT OFFICE OF TEST INFORMATION

Washington 25, D. C.

March 28, 1956

IMMUNIZATION REQUIREMENTS FOR ALL OBSERVERS MAKING TRIP TO ENIWETOK
PROVING GROUND

Each individual is required to possess an immunization record indicating that the following immunizations have been accomplished:

1. Smallpox -- within the last three years.
2. Typhoid -- within the last three years.
3. Tetanus -- initial series of injections or stimulating dose within the last four years.

Civilians must have in their possession Public Health Service Form 731 (PHS-731) "International Certificate of Inoculation and Vaccination."

IF any participant has none of these immunizations:

1. The smallpox immunization must be accomplished before arrival in Hawaii, tentatively scheduled for April 23, 1956.
2. Three typhoid injections are required, spaced at least one week apart.
3. Three tetanus injections are required and they take from three to six weeks.

NOTE: The injections required under 2 and 3 can be completed at Hawaii and at the Eniwetok Proving Ground.

It is necessary to have PHS-731 completed and available for presentation to the proper authorities upon return to Hawaii.

A fact sheet giving pertinent data on clothing, communications, tentative schedule, and other information will be furnished each principal and alternate upon receipt of certification of their nominations by the designating organization.
