Dear Jim:

I am speaking for Jim Shepley^x as well as myself when I say that we certainly appreciate your giving us a fair break on the hydrogen bomb release. After our conversation this afternoon I checked with our lab experts about the problem of reducing black and white motion picture film to stills. I learned that the most productive way for us to do this is to be able to work from the negative of the black and white film. From this -- negative of the entire film to be released -- we would surely be able to turn out an informative story.

Once again, many thanks and best regards.

Sincerely,

George P. Hunt
Chief LIFE Correspondent
