1. (Para. Endorsing acceptance Conference invitation and Suggestion on Press Announcement)

2. With respect to press statement, AEC suggests and State concurs that the Announcement should carry following substance:

A. The United States Government is pleased to accept the invitation of the Japan Science Council for a conference on the general subject of radioactivity in relation to human health and scientific procedures for detecting, measuring and guarding against its presence in the environment.

B. This Government will send a delegation of senior scientists expert in these fields to Tokyo for such a conference at a mutually agreeable date in the autumn of this year.

C. This conference will continue and expand the cooperation between United States and Japanese science for the sharing of the knowledge about radiation and the procedures for safeguarding <sup>it</sup> against/it which exists in both nations. This cooperation has been active over recent months with the United States providing as requested by the Government of Japan the aid of physicians and biologists through the Atomic Bomb Commission staff, and through
