	4. CLASSIFICATION CANCELLED
	5. CLASSIFIED INFO BRACKETED

Doc memo 9404251, 3/8/9

1. Japanese physicians have begun release their press versions of medical findings from _____ autopsy. All Japanese doctors quoted in newspapers have agreed that "radiation disease" was cause of death.

2. Mister Masao Tsuzuki has publicly concurred and supplied following details for YOMIURI reporter: "What I was most surprised to see was that his liver, heart, kidney, spleen, pancreas, and all the other internal organs affecting life had been so greatly changed that I could hardly recognize them. I think it means that radiation infiltrated and destroyed his body completely. I realize keenly how horrible the death ash is."
