112th AEC-MIC5. Fallout Program for HARDTACK

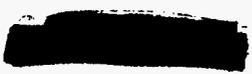

Meeting
6-27-57

Colonel O'Bryan summarized recent discussions concerning a proposed fallout program for Operation HARDTACK. He said that representatives of AEC, LASL, UCRL, AFSWP, NRDL, CRL, NYOO, SIO and JTF-7 had attended a conference on June 10, 1957, and recommended that a desirable fallout program should include air sampling, collector stations, an ocean survey and land collection stations at off-atoll weather and radsafe stations.

General Loper said that any expansion of present plans should be examined carefully because the DOD would be unable to increase its budget for support of any extensions to this program.
