

FROM PEARSON PASS TO BOSS

Recommend that Boss and Donaldson hold conference with Japanese scientists to discuss available information covering field of biology, L and D levels, monitoring of tuna and other allied subjects.

Pearson will meet Boss in Honolulu July 4 for trip to Eniwetok. Carry says that meeting with tuna canners should be in Los Angeles. Advise Pearson when Donaldson could meet with Revelle, Hiatt, Boss in Honolulu.

State Department wanted to add a statement to the effect that this does not preclude a broader-scale conference at a later date but Dr. Pearson would not OK that since he had not cleared with you.
