FOR IMMEDIATE RELEASE
APRIL 6, 1954

Dr. J. Robert Oppenheimer, Director of the Atomic Energy Commission, stated today that the results of the present weapons series tests conducted at the direction of the Commission were successfully carried out on Tuesday, April 6.

As a result of previous tests, the preparation for the tests the day and Air Force personnel attached to the Task Force carefully searched for the work visually and by radar for the detection of the objects of great importance to national defense which are to be derived from this test series.
