1. MISCELLANEOUS:

Adm. Tyree called a meeting in the JTF SEVEN Conference Room today at 0900 to discuss the survey of the danger area with the following present:

- | | |
|------------------|----------------------------|
| Adm. Tyree (USN) | Acting CJTF SEVEN ENISETOK |
| Col Pinson | Acting CTG 7.1 ENISETOK |
| Cdr Snyder | JTF SEVEN |
| Cdr Martens | TG 7.3 |
| Cdr Wendell | TG 7.1 |
| Cdr Patterson | CO USS COLLETT (DD-730) |
| Al Klements | JTF SEVEN |
| Bill Champion | Program 40 |

Adm. Tyree said that the survey of the Danger Area should proceed as soon as possible in order that the area can be disestablished concurrently with Johnston Island. This could be as early as 11 August and all work should proceed on that schedule. This survey would be made using the USS COLLETT (DD-730). The balance of the Program 40 surveys would be handled as planned using the USS SILVERSTEIN (DE-534). This means that the equipment must be installed on the COLLETT, removed and re-installed on the SILVERSTEIN.

Adm. Tyree directed that as soon as instructions were received from Program 40 (in answer to our messages dispatched yesterday) that the installations should be made on the COLLETT.

Al Klement talked with Dr. Donaldson via phone last night and Donaldson said the Program people would be here early next week and the survey would be completed by the 11th of August. (JHW)

Pat Ryan and J-6 have been notified of this. (JHW)
