19 July 1958

1. EVACUATION:

At Col Pinson's request the feasibility of personnel occupancy at YVONNE during the OLIVE event was examined. This would save many man-hours of work especially if there were several shot delays. It was decided that there will be no personnel hazards as far as blast, thermal fall out and wave action is concerned. Voice Count Down assembly staging areas can be arranged with an LCU standing by for emergency evacuation capability. Our evacuation letter for the OLIVE event will reflect this. (JHW)

2. WATER TRANSPORTATION:

Effective this date the water taxi and freight schedule attached as Incl #1 will go into effect. (JMW)
