Summary of Preliminary Findings
of the
Committee on Evaluating Foreign Tests (u)

This committee held a meeting in Washington on December 3rd in which the members of the committee compared the results of their respective work to date. The following is a summary of the consensus of the committee. The conclusions, especially those in the less certain categories, may be modified by further evidence or analysis. A documented and more complete report will be made later. In the present summary, no arguments will in general be given for the conclusions reached but these will be reserved for the later report. However, an attempt will be made to indicate the degree of confidence which the committee has in its conclusions and the areas of disagreement within the committee.

~~DELETED~~

The conclusions on this test are substantially those reached previously in the report by one of us (H.A.B).
