This is a further response to your memorandum dated February 16, 1994, requesting that we review attachments 1-4 for Department of Energy classified information, pertaining to radioactive fallout on the Marshall Islands. We have completed our review of the four attached documents. As a result of our review and review by the Department of the Interior, we have declassified the four documents.

Several documents still require a review by other government agencies. We shall return these documents to you when all reviews have been completed.
